

Industrial sector - other new activities and methods

Henry Adams, Department of Environment & Climate Change
Energy Savings Scheme Rule Workshop
3 April 2009

- Project Impact Assessment – forward creation
- Other proposals

Project Impact Assessment – forward creation

- Project Impact Assessment method currently limits forward creation to 2,000 certificates
- Forward creation helps reduce upfront project costs

Project Impact Assessment – forward creation

- Proposed new approach:
 - Forward creation for 5 years or life of project (whichever less)
 - Discount factors for future savings
 - Reporting obligations end once creation cease

Other Proposals

- Variable speed drives, timers and sensors
- Other opportunities to reduce transaction costs:
 - New activities and methods?
 - Administrative process?
